Specification Sheet

Move4U CrewPro Application

Create and share digital packing lists

Introduction To The CrewPro

An invaluable tool to mover crews across the globe, the CrewPro by Move4U Moving Technology is the industry benchmark for efficiently creating and sharing digital packing inventory lists. CrewPro's powerful features increase accountability and organization during the packing process, resulting in a smooth and speedy move for your company and your clients!

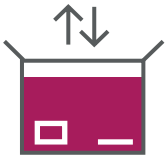

The CrewPro application can be both used as a reliable stand-alone tool and as an indispensable addition to your existing digital mover's tools. Being based on the same powerful and flexible state-of-the-art technology as the other digital mover's applications by Move4U, CrewPro offers seamless integration with these tools throughout the entire move process. Benefit from unmatched efficiency by re-using your digital pre-move survey data from SurveyPro as the foundation of your digital packing lists with CrewPro. Or use your photo-based packing lists after a move to check for individual item conditions at the moment of packing during claim-handling.

FIDI-FAIM compliant

Not only does the CrewPro increase standardization of your company's packing process, moreover the professional mover's application also enables you to share the digital packing inventory lists with your clients and to have them digitally sign and approve the packing inventory. And as these essential documents are centrally and safely stored in the cloud-based MoveDashboard by Move4U, you will always have every document at the ready for auditing purposes.
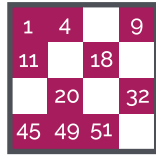

MOVE4U
MOVING TECHNOLOGY
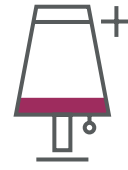

CrewPro key features

Advanced Packing And Delivery
CrewPro supports processes at both origin and destination. Easily assign packing and loading tasks to your crew at the origin address or unloading and unpacking tasks at the destination.

Delivery Bingo Check
Quickly cross off every item on the packing list when unpacking at the destination and never miss a single item again!

Add Additional Items
Items may need to be packed that were not on the initial pre-move survey report. CrewPro allows you to add these items quickly or in great detail.

Photo-based Packing Inventory List
Everything is better with pictures. Enrich packing inventory lists with photos of the packed items, boxes and containers, increasing process speed, insights and accountability for unpacking, claim-handling and auditing.

Label Scanning Technology
Get rid of old-fashioned scanning equipment and use your trusted tablet or smartphone to view item details and check them off your packing lists! CrewPro supports a wide range of label code types, including QR codes, interleaved codes, code 128, 38 and EAN 13 codes.

Work Offline In Low-coverage Areas
CrewPro is there whenever you need it. Even in areas where little or no data connection is available, you can rely upon CrewPro for intuitively creating and storing packing inventory lists – synchronizing them with your cloud as soon as a data connection becomes available again.

More features
CrewPro comes packed with even more powerful features, such as:

• Multi-Language Support
• Separate Delivery Lists
• Share Packing Inventory Lists With Your Customer
• Manage Packing Inventory Lists In The Cloud
• Based On The Latest Azure Technology

Sync With The SurveyPro To Get The Most Out Of Your Digital Move Data!

Combine the **CrewPro** with Move4U's **SurveyPro** to allow your packing crews to re-use your pre-move survey data for efficiently creating packing lists on the spot! All of your valuable data is safely stored, synchronized and made accessible through a secure environment for your company through your company's cloud-based **MoveDashboard** by Move4U.
